Letter to Asian Carp Czar.

Thanks for your effort in attempting to eradicate Asian carp fish. The Army corps of engineers are doing there best to contain the invasive species. Great! Once the fish are contained what next? My suggestion? Your department should issue RFP to interested parties to physically remove the fish from the rivers by over fishing one state at a time and pay for the removal. We spent 3 million to poison the fish it killed one fish ONLY. With three million dollars a substantial amount of Asian Carp fish would have been removed from the lakes.

We should have two stages of eradication one state at a time.

1. Army Corps Of engineers contain the fish with electric barriers
2. Fishermen, food processor, exporters, etc removed the contained fish
3. Somebody have to pay of the extraction
4. The notion that China loves to eat frozen Asian carp is not correct. They prefer live carp.
5. Put a bounty on Asian carp Fish. It worked in the past.
